series

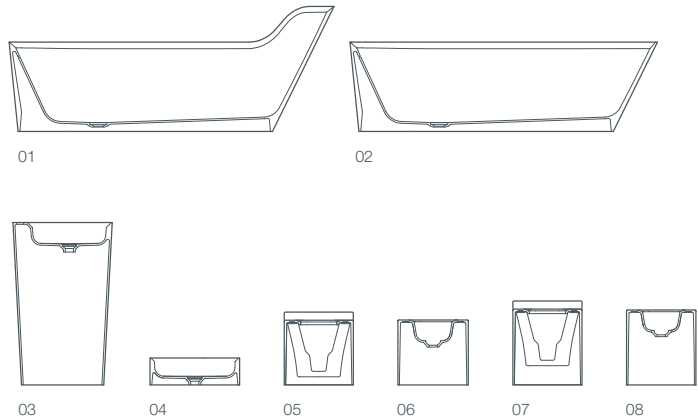

pearl

pearl

the epitome of awesome clean design. pearl interprets modern lines and is open in its uniformity. the key to the pearl is its classic form, it allows for leaning back and resting and with its warm embrace the haptic feedback is clearly perceptible.

pearl can be the center piece of a coordinated suite of bathroom furniture, all solid surface including bidet, toilet and washbasins, both freestanding and countertop.

- 01 / pearl bath, freestanding, 182x81x70/50 cm
- 02 / pearl bath oval, freestanding, 172x81x50 cm
- 03 / pearl washbasin, freestanding, 55x40x90 cm
- 04 / pearl washbasin, countertop, 50x40x15 cm
- 05 / pearl toilet, wall hung, 56x39x36 cm
- 06 / pearl bidet, wall hung, 56x39x36 cm
- 07 / pearl toilet, floor mounted, 56x39x42 cm
- 08 / pearl bidet, floor mounted, 56x39x42 cm

shine

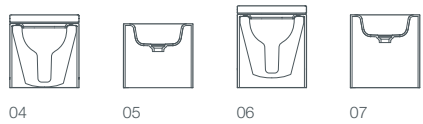

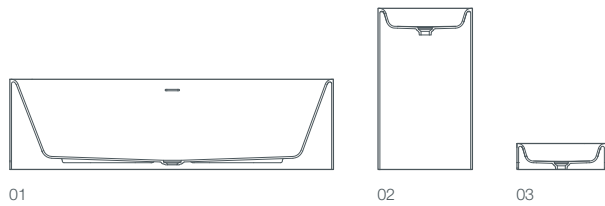

shine

'as we let our light shine we unconsciously give other people permission to do the same. as we are liberated from our own fear, our presence actually liberates others'. (marianne williamson)

inspirational words that embody the philosophy behind the exceptional series shine, which comes alive through subtle led illumination.

create a very special ambiance right in your own home with this unforgettable collection all capable of being individually illuminated.

- 01 / shine bath, freestanding, 180x80x50 cm

designed by peter jamieson

peter jamieson was born in england in march 1969 and studied at brighton school of architecture and design, graduating in 1991 with a bachelor of arts honors degree. he completed his first built solo project, 'hucclecote house' at the age of 25. upon completion, he moved to milan and worked in the studio of antonio citterio for 3 years.

amongst other projects, he worked on the showroom towers for 'smart' cars. then, returning to private practice, he moved to saint tropez and designed a number of villas and apartments along the french riviera. he moved to monte carlo in 2000 and opened his own studio here in 2002 to focus on industrial design, furniture projects and creative direction. he lives and works from monte carlo. a growing client list, includes boffi, ideal standard, tubes radiatori, deltacolor, and ritmonio.

his work has been selected for 'young and design'. the montecarlo radiators for tubes radiatori have been selected to represent the 100 best pieces of italian design for i-dot. and the 'waterblade' taps for ritmonio were chosen for the 2005 'good design' award from the chicago athenaeum museum of architecture & design.

k|stone® is a high quality composite 'solid surface' material developed by knief, the leading german bathroom equipment manufacturer. by its chemical composition, k|stone® is a natural mineral aluminum tri-hydrate powder mixed with acrylic-modified polyester resin. the addition of different natural pigments allows this material to be available in numerous colours and effects. resistance to all sorts of chemical and physical influences, as well as its completely impermeable surface make k|stone® the first choice for interiors when hygiene and neat design matter the most. the material has many advantages:

- waterproof: corrosion or swelling due to steam or moisture is not possible. the surface cannot be damaged by moisture, rot or mildew and liquids cannot penetrate it.
- 100% durable due to impact and shock resistance
- 100% hygienic, dirt repellent and stain resistant due to non-porous surface
- chemical resistant
- completely homogenous
- thermoformable
- pleasant to touch
- easy to repair
- flame and heat resistant (over 200 °c for a short time)

by using different grinding media with different grain sizes the gloss level of the surface can be adapted to your desired degree. despite its resistance, k|stone® is easy to mill, cut, drill or grind. like this, individual lettering or logos can be milled into the material. besides acrylic, k|stone® is perfect for combination with other materials. whether it is glass, wood, plexiglass or non-ferrous metals the diversity is huge.

series

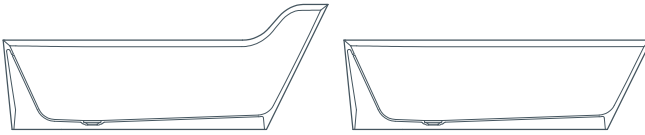

pearl

pearl

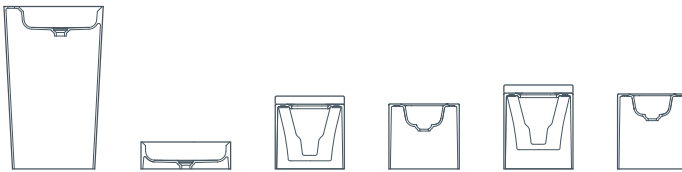

the epitome of awesome clean design. pearl interprets modern lines and is open in its uniformity. the key to the pearl is its classic form, it allows for leaning back and resting and with its warm embrace the haptic feedback is clearly perceptible.

pearl can be the center piece of a coordinated suite of bathroom furniture, all solid surface including bidet, toilet and washbasins, both freestanding and countertop.

coast

coast

adding to our vast k|stone® collection, coast offers a modern and elegant wall bath solution with a beautifully refined thin rim and a wide shelf at the wall to either install the taps or to put your shampoos and soaps.

01

01 / coast bath, back to wall, 170x75x60 cm

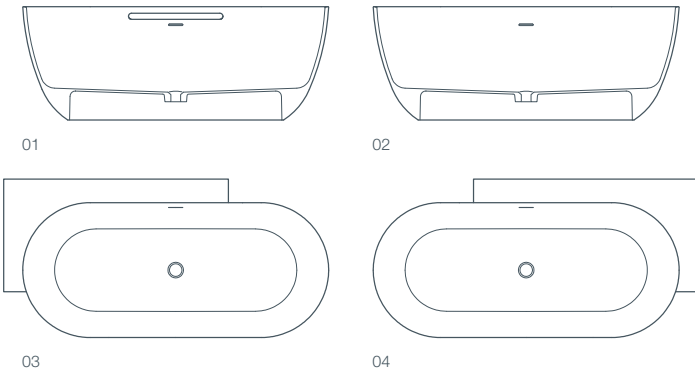

A photograph of a modern, white, oval-shaped freestanding bathtub. The tub is positioned in the lower-left foreground. The background wall is covered in a light-colored, textured material with a repeating pattern of semi-circular, overlapping shapes that resemble lotus petals. A horizontal strip of warm, yellowish light is visible at the top of the wall. The floor is dark, and a portion of a patterned rug is visible in the bottom-left corner.

lotus

lotus

another new addition to the k|stone® collection is lotus. with its high sides it is inviting you to relax. lotus is available with cutout slots which act both as a towel rail to keep your towel handy, and also as a practical grab bar for security. another version exists without the cutouts or as a corner version for niches.

- 01 /lotus bath, freestanding, w cutouts, 170x75x63 cm
- 02 /lotus bath, freestanding, w/o cutouts, 170x75x63 cm
- 03 /lotus bath, corner left, 181x88,2x63 cm

designed by peter jamieson

peter jamieson was born in england in march 1969 and studied at brighton school of architecture and design, graduating in 1991 with a bachelor of arts honors degree. he completed his first built solo project, 'hucclecote house' at the age of 25. upon completion, he moved to milan and worked in the studio of antonio citterio for 3 years.

amongst other projects, he worked on the showroom towers for 'smart' cars. then, returning to private practice, he moved to saint tropez and designed a number of villas and apartments along the french riviera. he moved to monte carlo in 2000 and opened his own studio here in 2002 to focus on industrial design, furniture projects and creative direction. he lives and works from monte carlo. a growing client list, includes boffi, ideal standard, tubes radiatori, deltacolor, and ritmonio.

his work has been selected for 'young and design'. the montecarlo radiators for tubes radiatori have been selected to represent the 100 best pieces of italian design for i-dot. and the 'waterblade' taps for ritmonio were chosen for the 2005 'good design' award from the chicago athenaeum museum of architecture & design.

k|stone® is a high quality composite 'solid surface' material developed by knief, the leading german bathroom equipment manufacturer. by its chemical composition, k|stone® is a natural mineral aluminum tri-hydrate powder mixed with acrylic-modified polyester resin. the addition of different natural pigments allows this material to be available in numerous colours and effects. resistance to all sorts of chemical and physical influences, as well as its completely impermeable surface make k|stone® the first choice for interiors when hygiene and neat design matter the most. the material has many advantages:

- waterproof: corrosion or swelling due to steam or moisture is not possible. the surface cannot be damaged by moisture, rot or mildew and liquids cannot penetrate it.
- 100% durable due to impact and shock resistance
- 100% hygienic, dirt repellent and stain resistant due to non-porous surface
- chemical resistant
- completely homogenous
- thermoformable
- pleasant to touch
- easy to repair
- flame and heat resistant (over 200 °c for a short time)

by using different grinding media with different grain sizes the gloss level of the surface can be adapted to your desired degree. despite its resistance, k|stone® is easy to mill, cut, drill or grind. like this, individual lettering or logos can be milled into the material. besides acrylic, k|stone® is perfect for combination with other materials. whether it is glass, wood, plexiglass or non-ferrous metals the diversity is huge.

series

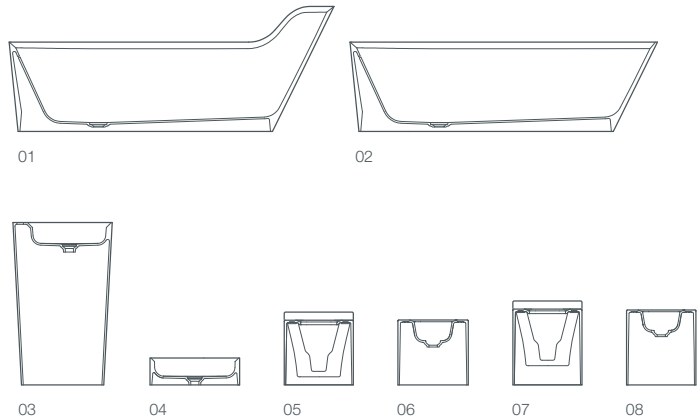

pearl

pearl

the epitome of awesome clean design. pearl interprets modern lines and is open in its uniformity. the key to the pearl is its classic form, it allows for leaning back and resting and with its warm embrace the haptic feedback is clearly perceptible.

pearl can be the center piece of a coordinated suite of bathroom furniture, all solid surface including bidet, toilet and washbasins, both freestanding and countertop.

- 01 / pearl bath, freestanding, 182x81x70/50 cm
- 02 / pearl bath oval, freestanding, 172x81x50 cm
- 03 / pearl washbasin, freestanding, 55x40x90 cm
- 04 / pearl washbasin, countertop, 50x40x15 cm
- 05 / pearl toilet, wall hung, 56x39x36 cm
- 06 / pearl bidet, wall hung, 56x39x36 cm
- 07 / pearl toilet, floor mounted, 56x39x42 cm
- 08 / pearl bidet, floor mounted, 56x39x42 cm

shine

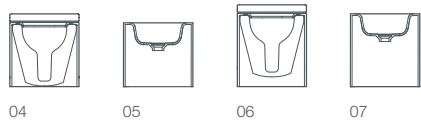

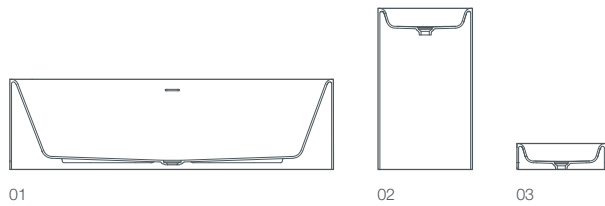

shine

'as we let our light shine we unconsciously give other people permission to do the same. as we are liberated from our own fear, our presence actually liberates others'. (marianne williamson)

inspirational words that embody the philosophy behind the exceptional series shine, which comes alive through subtle led illumination.

create a very special ambiance right in your own home with this unforgettable collection all capable of being individually illuminated.

designed by peter jamieson

peter jamieson was born in england in march 1969 and studied at brighton school of architecture and design, graduating in 1991 with a bachelor of arts honors degree. he completed his first built solo project, 'hucclecote house' at the age of 25. upon completion, he moved to milan and worked in the studio of antonio citterio for 3 years.

amongst other projects, he worked on the showroom towers for 'smart' cars. then, returning to private practice, he moved to saint tropez and designed a number of villas and apartments along the french riviera. he moved to monte carlo in 2000 and opened his own studio here in 2002 to focus on industrial design, furniture projects and creative direction. he lives and works from monte carlo. a growing client list, includes boffi, ideal standard, tubes radiatori, deltacolor, and ritmonio.

his work has been selected for 'young and design'. the montecarlo radiators for tubes radiatori have been selected to represent the 100 best pieces of italian design for i-dot. and the 'waterblade' taps for ritmonio were chosen for the 2005 'good design' award from the chicago athenaeum museum of architecture & design.

k|stone® is a high quality composite 'solid surface' material developed by knief, the leading german bathroom equipment manufacturer. by its chemical composition, k|stone® is a natural mineral aluminum tri-hydrate powder mixed with acrylic-modified polyester resin. the addition of different natural pigments allows this material to be available in numerous colours and effects. resistance to all sorts of chemical and physical influences, as well as its completely impermeable surface make k|stone® the first choice for interiors when hygiene and neat design matter the most. the material has many advantages:

- waterproof: corrosion or swelling due to steam or moisture is not possible. the surface cannot be damaged by moisture, rot or mildew and liquids cannot penetrate it.
- 100% durable due to impact and shock resistance
- 100% hygienic, dirt repellent and stain resistant due to non-porous surface
- chemical resistant
- completely homogenous
- thermoformable
- pleasant to touch
- easy to repair
- flame and heat resistant (over 200 °c for a short time)

by using different grinding media with different grain sizes the gloss level of the surface can be adapted to your desired degree. despite its resistance, k|stone® is easy to mill, cut, drill or grind. like this, individual lettering or logos can be milled into the material. besides acrylic, k|stone® is perfect for combination with other materials. whether it is glass, wood, plexiglass or non-ferrous metals the diversity is huge.
